Education

University of California, Los Angeles — **Los Angeles, CA**
Doctor of Philosophy in Mathematics (Applied) — *September 2024 – June 2029*

- Applied concentration

California Polytechnic State University, San Luis Obispo — **San Luis Obispo, CA**
Bachelor of Science in Physics and Mathematics, Summa Cum Laude — *September 2019 – December 2023*

- Double major in physics and mathematics
- Cummulative GPA of **3.95**
- Coursework in differential equations, real/complex analysis, classical/quantum mechanics, statistical mechanics, differential geometry, abstract algebra, electromagnatism, and data science

Research Experience

SULI (Science Undergraduate Laboratory Internship) — **Fermi National Accelerator Laboratory**
External beam delivery department — *June 2022 – August 2022*

- Worked under Dr. Diktys Stratakis in the accelerator division on simulation and data analysis to support the Muon g-2 and Mu2e experiments
- Ran simulations in G4beamline (a Geant4 based simulation toolkit) of beamline and beam optics
- Extracted Courant-Snyder parameters from beam data taken within the Fermilab muon campus via python

Crab Cavity Accelerator Research — **Cal Poly SLO**
Physics department — *January 2021 – Present*

- Worked under Dr. Themis Mastoridis in the investigation of control system design for crab cavities in the EIC and HL-LHC
- Created simulation framework in MATLAB/Simulink to test transverse beam stability and power draw with different controller configurations
- Integrated fortran code from Brookhaven National Lab to determine adequate system impedance reduction with different controller configurations
- Contributed to presentation given to Brookhaven National Laboratory and presented work at APS FWS meeting, CSU Research Competition

COMAP Mathematical Contest in Modeling — **Cal Poly SLO**
Mathematics Department — *February 2020/2021/2022*

- Competed each year for 3 years representing Cal Poly in international math competition
- Contest consists of a 4 day long period of research real-world problem, creating and simulating a mathematical model for the problem, and writing a 25-page research report on the model developed
- Topics: 2020 - migrating fish populations in northern Scotland; 2021 - fungal growth and decomposition of ground litter; 2022 - optimal power output for long-distance road cyclists
- Successful participant in 2020 and 2021 competition and finalist/MAA award in 2022 competition

Technical Intern in Modeling and Simulation — **Johns Hopkins University Applied Physics Lab**
Special concepts and engineering section — *June 2021 – August 2021*

- Worked on several projects in modeling and simulation as part of a 10-week technical internship
- Developed a matlab/simulink model for the hydraulic system of a submarine as part of a larger-scale

submarine pilot training simulation
- Worked on and debugged numerical simulation of undersea cable dynamics
- Work involved coding in matlab, C#, C++ and large-scale collaborative coding through git

Aerospace Engineering Team Member/ADCS Team Lead **Cal Poly CubeSat Laboratory**
Cal Poly aerospace engineering department *November 2019 – June 2022*

- Worked on the design, simulation, and testing of the CubeSat attitude determination and control system (ADCS)
- Developed matlab/python simulations in system power, spacecraft/orbital dynamics, and control loops as well as supported software implementation of controllers and sensors as a member of the aerospace engineering team
- Organized meetings, mentored younger students, and provided trainings in control theory, rigid body dynamics, and matlab as the ADCS team lead

Work Experience

Embedded Systems and Algorithms Software Engineer **Goleta, CA**
Toyon Research Corporation *January 2024 - September 2024*

- Designed, implemented, and tested control algorithms for both electric motor and RF systems on several embedded platforms including TI C2000 and EFM32
- Simulated and implemented digital signal processing techniques in MATLAB and ROS2 environments
- Designed and implemented MATLAB/Simulink Coder workflow for deployment of real-time algorithms on embedded systems
- Assisted with proposal writing

Presentations

MAA MathFest 2022 **Philadelphia, PA**
Undergraduate poster session *August 5th 2022*

- Presented work "Applying Optimal Control with SQP to Cycling Performance Represented by Constituent Course Elements" as part of the "Research in Motion" undergraduate poster session
- Presented work done for award winning paper submission in the COMAP mathematical contest in modeling
- Poster presentation designated by MAA as one of the "outstanding posters" for undergraduate session

SULI poster session **Fermi National Accelerator Laboratory**
Summer poster presentation *August 10th 2022*

- Presented "Beam Optics Analysis from the Mu2e External Line Commissioning" to Fermilab scientists and engineers
- Presentation based on research work done over the 10-week summer period on initial beam data analysis and comparison to simulation

APS Far West Section Meeting **University of Hawai'i at Mānoa, Honolulu, HI**
Poster session *October 7th 2022*

- Presented "Crab Cavity Low-Level RF Design Simulation Tools for the Electron-Ion Collider" as part of student poster session

CSU Research Competition **Cal Poly, SLO/ San Diego State University, San Diego, CA**
Research Presentation *February 25th/ April 29th 2023*

- Presented "EIC Crab Cavity Low-Level RF Design" to a panel of judges and students at Cal Poly (Feb) and at SDSU (Apr) for the CSU Research Competition in the Mathematical Science undergraduate section
- One of 10 students selected to present again at the state-wide competition at San Diego State University

- **CSM Student Research Conference** — **Cal Poly, SLO**
  Research Presentation — *May 18th, 2023*
  - Presented "EIC Crab Cavity Low-Level RF Design" to students and faculty in the college of science and mathematics
- **APS Far West Section Meeting** — **UCSD, San Diego, CA**
  Research Presentation — *October 7th 2023*
  - Presented "EIC Crab Cavity Low-Level RF Design" in session on accelerator and high energy physics

Awards

- **Academic Excellence Award in Phyiscs**
  Presented by the Bailey College of Science and Mathematics for academic excellence — *May 18th 2024*
- **MCM Finalist and MAA Award for Question A**
  2022 COMAP MCM submission, "Applying Optimal Control with SQP to — *May 2022*
  Cycling Performances Represented by Constituent Course Elements"
- **2022 MAA MathFest Outstanding Poster**
  Presentation of MCM 2022 Submission — *August 6th 2022*
- **President's Honor List**
  For a consistent GPA above 3.5 for 3 quarters out of the year — *2019-2023*
- **SPS Poster Award**
  For presentation of "Crab Cavity Low-Level RF Design Simulation Tools for the — *November 1st 2022*
  Electron-Ion Collider" at APS FWS
- **Physics Dept. Outstanding Student Award**
  Presented by the physics department for academic excellence, research, — *June 10th 2024*

  and project excellence

Skills

- **Coding Languages:** python, matlab, mathematica, embedded C, C++, html, C#, fortran
- **Coding Workflow:** gitlab, github, scrum
- **Other Software Environments:** ROS2, Simulink, Unreal Engine
- **LaTeX Typesetting:** beamer (for presentations), beamer (for posters), BAPoster

Other Experience

- **Engineering Technical Intern** — **Raytheon Technologies, El Segundo, CA**
  Airborne Radar Section — *June 2020-August 2020*
  - Worked on a team of 4 interns on the systems engineering team in developing a simulation of the F-15 airborne radar returns from digital terrain elevation data (DTED)
  - Modified simulation to different operating bandwidths, different antenna patterns (from a separate antenna model) and different signal processing techniques
- **Upper Division Math Grader** — **Cal Poly SLO**
  Mathematics department — *September 2022 – June 2023*
  - Worked as a grader for the upper division, intro to analysis series (Math 412,413,414), introduction to proofs (Math 248), and calculus 4 (241) for Dr. Erin Pearse
- **Modern Physics Grader** — **Cal Poly SLO**
  Physics department — *January 2021 – March 2021*
  - Worked as a grader for the modern physics course for Dr. Oleg Kogan
